"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov/>".

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or Water Rights in California, and (3) Appropriation of Water in California.

Water to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Informational Pamphlet, (3) Appropriation of Water in California.

Statements of Water Division and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

An appropriative right is a surplus not needed by riparian water users. Generally, appropriate rights may be exercised only when the riparian right to the natural stream is a surplus not needed by others, return flows from groundwater, or other "foreign" water to the natural stream a different watershed, water previously stored by others, return flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Reservation of the riparian right to the severable parcel. Generally, a riparian water user must share the water supply by an intervening parcel without the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel in a different watershed.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the servient parcel. Generally, a riparian user must share the water supply later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus net needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statement of Water Division and Use. must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statement of Water Division and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"
